EXPERIENCE

React Developer
Ottomern Technologies
📅 Sep,2022 – Nov, 2023

Client: Suntec India Web Services Pvt. Ltd.

Project Title: Byte Ready

Technologies Used: ReactJs, Redux, MUI, HighCharts

- Developed a social media sharing platform using React.js, Redux, MUI, and HighCharts.
- Enabled users to create and share posts seamlessly on platforms like Instagram and Facebook.
- Built scalable websites with React.js and Redux, handling complex API calls for efficient frontend components.
- Visualized 100% validated data using Highcharts and created responsive React components.

Project Title: Project Mix

Technologies Used: ReactJs, Bootstrap

- Implemented a product lifecycle tracking application using React.js and Bootstrap.
- Managed complex states with React hooks and tackled challenging API calls for interactive frontend components.

Client: Terai datalabs Pvt. Ltd.

Project Title: CRM

Technologies Used: Reactjs, Redux, MUI, HighCharts, Moment, useform

- Developed a web application for managing customer relationships, integrating React.js, Redux, MUI, and HighCharts.
- Integrated APIs for seamless data retrieval and updates, maximizing efficiency in data visualization.
- Created responsive React components and managed complex states using MUI and React hooks.

Project Title: IT Asset Management

Technologies Used: Reactjs, Redux, MUI

- Designed a web application for tracking and managing digital assets using React.js, Redux, and MUI.
- Implemented Frontend CRUD operations for direct data manipulation within the user interface.
- Designed a dashboard using MUI

Client: Tekclan Software Solutions Pvt. Ltd.

Project Title: Doc Studio

Technologies Used: ReactJs, Redux, AntDesign.

- Contributed to the development of a document generation application using React.js, Redux, and AntDesign.
- Integrated APIs for document generation and communication services, focusing on error handling.
- Developed dynamic and interactive pages for enhanced user experience.

Game Developer Trainee
Algomics Technologies Private Ltd
📅 Jun,2022 – Aug,2022

Technologies Used: Javascript

- Developed the front-end of a casino game using JavaScript and the company's framework.
- Managed game assets and implemented game simulations.

EDUCATION

Bachelor of Technology, Dr A.P.J Abdul Kalam Technical University

Diploma in Engineering, Invertis University

High School, CBSE Board

TECHNICAL SKILLS

Tech Stacks
HTML | CSS | JavaScript | React.js | Redux-Toolkit | Redux-Thunk | TailwindCSS | MUI | Vite| Parcel | Babel | Node.js | MongoDB | Express.js | RESTful APIs | JSON | JIRA
Tech Tools
Git | GitHub | Postman | Jira | VSCode

PROJECTS

TableTrekker [Github]
MERN | Redux | MUI.
- Implemented a system for ordering food from specific tables in a restaurant.
- Designed and implemented admin & customer panel interfaces, ensuring smooth data flow between React & Express.
- Collaborating on the overall application architecture.
